

Number_Sonics

**The world's first and only
guide to date-based music
creation, volume 1**

By Misha Pelt

May good things keep happening...

Great ideas are often simple

Composing melodies from date of birth is easy, but very few people know how to do it.

Welcome between the Number_Sonics pioneers!

You can contact me on mishapelt.com for support.

How we do it

We will use numerology principles to calculate the date to a single digit.
That gives us the Key.

After we discover the Key, we write down the scale, to find out the notes.

We apply those notes to the date, and melody is born.
Well, derived.

Now it is time for your creativity, style, feelings to add into it, you know, the soul things.

I will break it down more, in the next pages.

Calculate the date to a single digit

This is best to see in action.
Take a date 15.11. 2018

$$1 + 5 + 1 + 1 + 2 + 1 + 8 = 19$$

Nineteen is *not* a single digit, you have to calculate more

$$1 + 9 = 10$$

Ten is also *not* a single digit

$$1 + 0 = 1$$

One is a single digit!

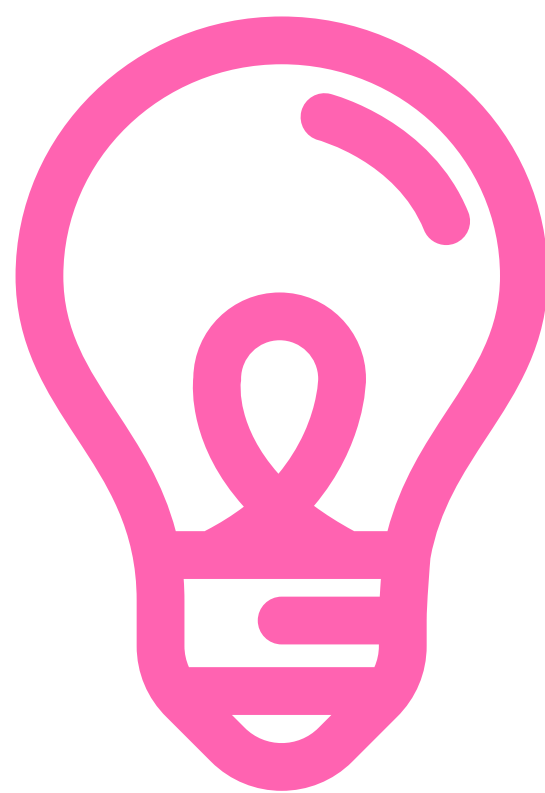

In numerology, they do calculate until last single digit possible, number 9.

We, in music, see number 8 and 9 as next 1 and 2.
You might be aware of jazz chords....like Am9/11.
The 9 and 11 is simply 2 and 4, only an octave higher
(but that is for another book)

So far we've learned, that we are going to be working
with numbers 1 through 7. Just like the 7 basic music
keys and skills!

Are you getting a clue now ???

Find out the key

There is seven basic keys in music:

C, D, E, F, G, A, B,

There is seven numbers:

1, 2, 3, 4, 5, 6, 7

Our date came as number 1, given numbers to the keys, number one = Key of C

There is nothing difficult about that, is it?

1 = C, 2 = D, 3 = E, 4 = F, 5 = G, 6 = A, 7 = B

Derive the notes

Once we have the Key our tune will be in, we need to find the notes. We do it with help of numbers again.

This time, each note of the key, (the scale), gets a number. And yes, again they are from 1 through 7.

In our case the date 15th of November, 2018 came out as a single digit number 1, which is the Key of C. Now, we will assign number to each of the notes of the C scale.

c, d, e, f, g, a, b, c
1, 2, 3, 4, 5, 6, 7, 1

and apply those notes to the date.

15.11. 2018
c g c c d c (b) c

I will explain to you the b in brackets in the next page :-)

Remember that we are only working with 7 numbers, while finding the Key? There are 7 numbers in the scale as well. When working with numbers higher than 7, you can choose to only use 1 instead of 8 and 2 instead of 9, OR you can make it more interesting, by using number 7 AND number 1 or 2. In our example the b represents the 7 and it is optional - brackets. You can also use just a c tone, without b, which the 8 means as well.

What I do, when making these tunes is I stick the Key note at both the beginning and end of the note sequence to open and close it nicely.

C_ C G C C D C (B) C_ C

We were fortunate that the tune came in the Key of C, which is considered the easy Key. Synchronicity.

Do not worry, I will leave you with all the keys, notes and numbers, so you have a reference point. You can find notes in keys easily, in case you do not know it yet, and most likely if you keep making these tunes frequently, you will memorize it quickly. When we have fun, we learn fast!

Table of Keys, notes and numbers

	1	2	3	4	5	6	7
Key of C	C	D	E	F	G	A	B
Key of D	D	E	F#	G	A	B	C#
Key of E	E	F#	G#	A	B	C#	D#
Key of F.	F	G	A	Bb	C	D	E
Key of G	G	A	B	C	D	E	F#
Key of A	A	B	C#	D	E	F#	G#
Key of B	B	C#	D#	E	F#	G#	A#

The Keys have numbers, 1 through 7. The notes in the Key are also numbered 1 through 7. We are full of numbers and we are only scratching the surface of what is possible in this book. Stick with me and see.

:-)

!!!Congrats!!!

This is it. This is how you make Number_Sonics, tunes derived from date. Usually it's a date of birth.

I'm also making them from names. That will be in volume 2.

Volume 3 will teach you how to implement chords, but with that I will wait to make sure that there is enough interest. It is bit more difficult. I also have a guitar method, that uses numbers, shapes, and allows you to compose your own music easily. I call it The E-System For Guitars, as it is very relevant to E string.

There is quite a lot in my head to share with you guys.

And then there is the Money Button. I will tell you more on the next page.

Money Button

Money Button is payment system, instant, no fees, peer to peer. It is like a magical button of the intrnet.

It is very easy to create one, you can do it on moneybutton.com

If you want to use it to receive tips or sell staff, you can instal it on your website, easily. You choose the tip/sell amount as little or high as you wish. Micropayments are powerfull!

When you create it, you are given a code. You take that code and paste it in HTML widget on your website. Done. If you would like some help, reach out to me, I love Money Button, I am using it, it empowers me, and I wish the same for you too. If I can, I will help.

This is the end and the beginning

Now that you know how to make a tune from a date of birth you can easily create present at any time. You can teach it as well. Use is as therapeutic tool. Music is a vibration, and if derived from date of birth, ...

You are empowered to create original music and a better world.

I kindly Thank You for your interest in this novel idea, and for being the first to jump on.

May good things kepp happening...

May good things keep happening...

P.S.

Send me your website with
Money Button, and I will add
you to mine for more
visibility!!!
